

ENDE GELÄNDE!

29/11 - 1/12 2019

GOES LUSATIA!

BETWEEN BERLIN & DRESDEN

ENRAGED AND DISOBEDIENT – DOING CLIMATE JUSTICE OURSELVES

WE ARE THE SYSTEM CHANGE!

The German government gave up on the 1.5° limit – but we haven't! Instead of burying our heads in the sand, it's time to get moving. We will go straight to the place of destruction – into Lusatian mining area. While the government wants to pin down the end of lignite mining to 2038, we will introduce the immediate end of it. In a mass action of civil disobedience, we will stop the lignite mining infrastructure, together with you and many other people. We will end the time of fossil capitalism.

MASS ACTION IN LUSATIA

For the kickoff of the UN-climate summit in Santiago de Chile, the global climate strike will go into the next round: from 11/29 to 12/01, we will protest for climate justice together with Fridays for Future throughout a big weekend of action. No matter whether it's a school strike or the blockade of a digger – only by being disobedient we can stop the climate crises.

The time is right for a system change: it is about borderless solidarity and a good life for all instead of profit and growth. Our protest is directed at all inhumane ideologies. We solidarize with antifascist and antiracist struggles, locally as well as globally!

CIVIL DISOBEDIENCE FOR EVERYONE!

Our type of action is an openly announced mass blockade with many ways to participate. We will be calm and considerate, we won't endanger anyone. We want to create a situation that is transparent for all participants, in which we can watch out for and support one another.

A system change isn't gonna happen by itself.

That's why we will do it ourselves, disobediently and together! Let's go, Ende Gelände!
